

TELECOM INFRASTRUCTURE

TELECOM INFRASTRUCTURE

The goal of our profound services is the construction and upgrading of optimal mobile telecom networks. We market solutions that are soundly engineered, economical and aesthetically appealing.

Under the slogan "Always accessible on the way," we act as general contractor, building infrastructure for wireless, mobile and similar communications networks for all operators. We are your professional point of contact for planning, acquisition, design, construction and ongoing maintenance.

For over 25 years we have been meeting the highest standards throughout Switzerland. We have a presence in every language region and every part of the country, serving our customers with absolute reliability.

Our areas of competence

- Wireless network design and acquisition
- Engineering and design
- Civil work
