

SPECIAL PROJECTS

SPECIAL PROJECTS

Special projects do more than break up routines; they also pose challenges and create opportunities for benchmark accomplishments. ETAVIS can demonstrate its know-how, experience, creativity and flexibility.

We provide you with expert consulting and detailed bid specifications – both absolute essentials for investing in the complex telecommunications market.

We offer state-of-the-art in-house telecommunications capabilities. We can address special building design features in supplying base stations and repeaters for airports, railway stations, shopping centers, sports stadiums and many other facilities.

Clear, continuous data communication service in highway and railway tunnels means enhanced safety and meets the needs of today's communications-hungry society.

We develop, fabricate and operate mobile base stations for special events, rescue missions and other temporary services.

Our areas of competence

- Consulting
- Studies
- In-house systems
- Tunnels
- Mobile base stations
