

DISTRIBUTION AND LOGISTICS

DISTRIBUTION AND LOGISTICS

Our logistics division assures you of access to suitable material in sufficient quantities. ETAVIS offers the needed infrastructure for sound inventory control and safe, efficient handling.

Our evaluation experts perform checks against technical specifications, determine availability and price and identify products and vendors.

It does not matter whether you need a lot of material or a little. Our coordination staff keeps track of requirements and ensures availability on demand.

The ETAVIS Group's central purchasing department supports, optimizes and facilitates procurement. Periodic discussions and clearly defined conditions form the basis of partnership for good supplier relationships.

By using appropriate inventory management software, we can track components and provide up-to-the-minute information on catalog numbers, vendors, items in stock and available quantities.

Delayed deliveries entail extra costs and dissatisfaction. Our distribution team knows the value of reliability.

Our areas of competence

- Evaluation
- Coordination
- Procurement
- Inventory management
- Distribution
